TSANG SZE SZE

PROFILE

Hello! I'm CC. A designer and front-end web developer. With a design education background, I learnt web development by myself with the help of internet resources. I am curious to learn new things and love the process of learning. So whenever possible, I also like generating new ideas and solutions to solve problems. For example, with the knowledge and experience in both front-end development and UX/UI design, I am more able to jump out of the box and give solutions from another aspect during web/mobile development. Compared to architectural projects, projects like web/mobile give me more satisfaction as I can see how my products are working and fulfilling daily needs more clearly. So I am excited to engage in the relevant field and appreciate any chance to go further.
