TSANG SZE SZE ◀◀

PROFILE

Hello! I'm CC. As a fresh graduate this year with a degree in architecture. I started to dive into front-end development and equip myself with more about it in June of this year. Along the way, I found myself enjoyed a lot with solving problems and building something nice. Compared to architectural projects, front-end projects give me more satisfaction as I can see how my products work more clearly. I am excited to engage in the field and appreciate any chance to go further.

PROJECTS

❯ Portfolio Website

Link Here /   https://tsangszesze.github.io
